

Clay Pot Decor

These are beautiful and so simple to make! They can be used as candle holders, centerpieces or storage jars for candies or small accessories.

Any clay pot and saucer will do but make sure the opening of glass bowl you choose will fit the saucer to form the lid.

Simply paint the clay with acrylic paint and apply a high gloss acrylic coating for added protection. I used E-6000 glue to securely attach the glass on the bottom side of the pot.

The saucer, turned upside down, becomes the lid. For the knob, I actually made them from clay but you can use wooden spheres found at crafts shops, large glass beads, even marbles will work. Get creative! Use small plastic toys for a kids room or hardware for an industrial look.
